

## COMPOSITION

Vitamin A (Acetate) 1000 IU, Aloe Vera (200x Concentrate) 2 mg, Atriplex 10 mg, Vitamin B<sub>1</sub> (Thiamine HCL) 10 mg, Vitamin B<sub>12</sub> (Cyanocobalamin) 10 µg, Vitamin B<sub>2</sub> (Riboflavin) 10 mg, Vitamin B<sub>3</sub> (Nicotinamide) 10 mg, Vitamin B<sub>5</sub> (Calcium Pantothenate) 100 mg, Vitamin B<sub>6</sub> (Pyridoxine HCL) 10 mg, Citrus Bioflavonoids 25 mg, Biotin 300 µg, Vitamin C (Calcium Ascorbate) 300 mg, Calcium (Gluconate) 5 mg, Choline (Bitartrate) 10 mg, Folic Acid 10 µg, Inositol 10 mg, Iron (Gluconate) 2 mg, Magnesium (Gluconate) 5 mg, Manganese (Gluconate) 2 mg, PABA (Para-Aminobenzoic Acid) 5 mg, Potassium (Gluconate) 2 mg, Selenium (Methionine) 10 µg, Zinc (Citrate) 10 mg, Chromium (Picolinate) 25 µg, Lactobacillus Acidophilus (10 Billion per gram) 50 mg, Vitamin D<sub>2</sub> 50 IU, Vitamin E (D-Alpha Tocopherol Succinate) 16,7 mg (Providing 16,7 mg of actual Tocopherol), Betacarotene (from Dunaliella Salina Algae) 1 mg (Equivalent to Vitamin A 166 µg).

## DOSAGE:

1-2 capsules before meals or according to doctor's instructions.

Food supplements should not be used as meal replacements. Do not exceed the recommended daily dose.

## DOES NOT CONTAIN:

Gluten, Wheat, Lactose, Preservatives, Dyes and Yeast.

No added sugar.

# ANOSYN

Balanced mix of vitamins, minerals and organic substances that enhance and maintain a healthy immune system.

## ANOSYN

The human body receives incessant attacks by pathogens and toxic substances found everywhere: in the air, food, water. Additionally there is the negative influence of electromagnetic, geopathic and other radiation that disrupts the function of the immune system cells. The wide use of antibiotics and other chemical substances suppress the defense mechanism.

**ANOSYN** with a powerful combination of active biological substances strengthens the immune system.

**ANOSYN** with its rich composition of nutrients and powerful antioxidants, ensures the smooth function of the defense system. Strengthens the body when facing situations with severe fatigue or increased requirements (puberty, school exams, sports, special diet, etc.).

Both synthesis and dosage regulate and stabilize the immune system, supporting any lack of cell energy and also inhibit aging mechanisms.

The key ingredients that help support the immune system are:

- **Vitamins A, C and E**, with strong synergistic antioxidant action.
- **Vitamin B5** (Pantothenic acid), necessary for the production of antibodies.
- **Choline**, which supports the detoxifying function of the liver.
- **Vitamin B12 & Folic Acid**, essential for cell production.
- **Vitamin B3** (Niacin), which enhances the function of the digestive system.
- **Iron**, essential for hematopoiesis, enhances the body's resistance.
- **Zinc & Selenium**, necessary for production of cells, enzymes and other body processes.

All other biologically active substances, minerals, trace elements, promote metabolic processes, the release of energy from food, cell oxygenation, helping to synergistically strengthen and maintain the immune system.
