

CANDIFORM is a carefully balanced composition, which creates a negative environment for the growth of pathogenic bacteria which lead to imbalance of the intestinal flora and mucosa.

CANDIFORM by developing 'friendly' bacteria helps to better digest food, produce vitamins and simultaneously promotes the restoration of balance and normalization of the intestinal flora.

DOSAGE:

2-3 capsules daily or according to doctor's instructions.

Food supplements should not be used as meal replacements. Do not exceed the recommended daily dose.

DOES NOT CONTAIN:

Gluten, Wheat, Lactose, Preservatives, Dyes and Yeast.

No added sugar.

ONLY FOR MEDICAL / SCIENTIFIC INFORMATION

CANDIFORM

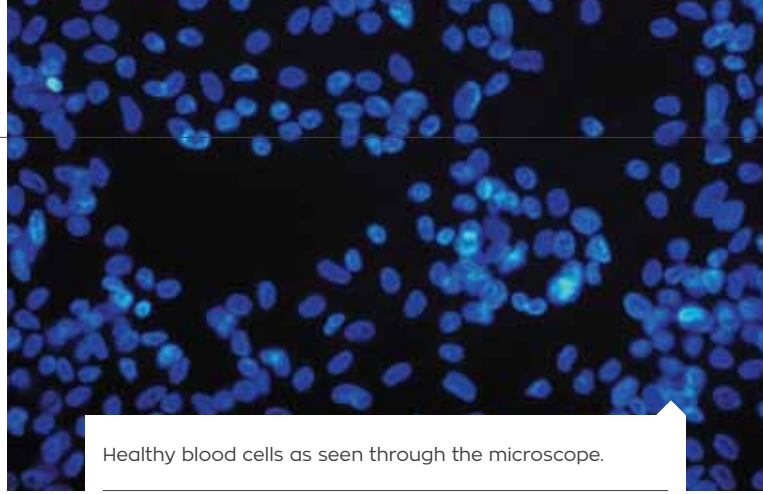

To protect
the intestinal flora and mucosa
against harmful fungi (Candida Albicans).

CANDIFORM

There are multiple reasons for the impairment of the intestinal flora. Today mono dimensional diet based largely on foods such as white flour, rice, sugar, etc. does not actively help digestion. Also, the lack of time, fast food consumption, diets, stress, travel, taking antibiotics and oral contraceptives negatively affect digestion and lead to excessive fungi growth.

If an imbalance of the gut flora eventuates, a disproportionate increase of pathogenic bacteria is noted causing infection known as candidiasis and affects both men and women. Symptoms appear, caused by the appearance of new food allergies, fatigue, digestive disorders, gas, bloating, craving for sugar, repeated infections, etc.

Blood cells infected by Candida as seen through the microscope.

Healthy blood cells as seen through the microscope.

CANDIFORM helps restore gut flora, creating a favorable environment for the growth of “friendly” bacteria.

It also prevents the growth of pathogens (bacteria, parasites, fungi) and the formation of a toxic environment in the intestine, thus gradually strengthening the immune system.

It is effective in chronic constipation, acts beneficially normalizing the colon, bile and the stomach without causing irritation. It contributes significantly towards treating skin irritations, fungal infections (skin and nails), through direct action against the pathogen but also for prevention.

COMPOSITION

Vitamin C (Ascorbic Acid) 150 mg, Psyllium Husk Powder 75 mg, L-Arginine 50 mg, L-Ornithine 50 mg, Vitamin B₅ (Calcium Pantothenate) 45,8 mg, Lactobacillus Acidophilus 20 mg, Vitamin A 300 µg, Biotin 100 µg, Selenium (Methionine) 50 µg.
